WHO WE ARE

Family-owned capability with serious civil-site equipment.

Eire Vacuum Services is a family-owned and operated specialist in vacuum excavation, hydro excavation and industrial cleaning. We support contractors, utilities, councils, industrial facilities and major infrastructure projects with safe vacuum loading, high-pressure water jetting, confined space cleaning and compliant waste disposal.

Why Eire Vacuum Services?

Business	Family-owned and operated
Experience	14+ years industry experience
Response	24/7 emergency response available
Service area	Sydney, Newcastle, Wollongong, Central Coast and surrounding NSW regions
Contact	02 5023 3473 info@eirevacuumservices.com.au

8,000L and 10,000L Capelotto combination trucks.

Before: high-rise planter box clean-out with controlled hose access.

After: soil, slurry and loose material removed.

Vacuum loading, safe excavation and industrial clean-out support.

Vacuum Excavation

Utility locating, potholing, trenching, service proving and non-destructive digging around underground assets.

Hydro Excavation

High-pressure water and vacuum loading for controlled excavation, spoil removal and sensitive worksites.

Industrial Cleaning

Tank, pit, wet well, grease trap, OSD, confined space and industrial vessel cleaning.

High-Pressure Water Jetting

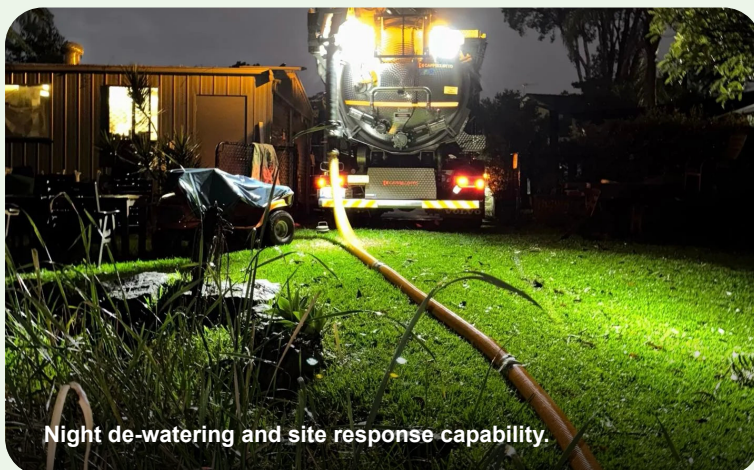

Blocked drains, stormwater systems, culverts, pipe cleaning and site clean-out support.

Liquid Waste Management

Transport and EPA-compliant disposal of sludge, slurry, oily water and non-toxic liquid waste.

OSD & Drainage Assets

OSD tank cleaning, stormwater clean-out, culvert cleaning, sediment removal and drainage maintenance support.

Planned, risk-assessed cleaning for tanks, pits, wells and enclosed assets.

Our experienced team is trained to work in hazardous and restricted environments using specialised vacuum excavation equipment to remove sludge, sediment, contaminated waste and debris while minimising manual handling and reducing risk.

Confined Space Services Include

- ✓ Tank cleaning and sludge removal
- ✓ Pump station and wet well cleaning
- ✓ Pit, chamber, valve pit and service pit cleaning
- ✓ Sump, trench and OSD tank cleaning
- ✓ Grease trap cleaning
- ✓ Industrial vessel cleaning
- ✓ Sediment, slurry and liquid waste removal

Safe Work Practices

- ✓ Site-specific SWMS
- ✓ Risk assessments
- ✓ Confined space entry procedures
- ✓ Rescue plans
- ✓ Gas monitoring during works
- ✓ Full PPE and safety equipment
- ✓ Communication systems and standby personnel where required
- ✓ Public liability insurance and workers compensation

Modern Capellotto combination trucks with vacuum loading and jetting capability.

8,000L Capellotto

Combination vacuum truck for civil, commercial, drainage, confined space and hard-access works where truck size, hose run and disposal runs matter.

10,000L Capellotto

Additional capacity for larger de-watering, slurry, liquid waste and vacuum excavation jobs across NSW service areas.

Combination Capability

Vacuum loading plus high-pressure water jetting for excavation, cleaning, OSD and drain support.

Hose Reach

20m standard hose with extended reach options available depending on site access and job planning.

Waste Disposal

EPA-compliant transport and disposal for suitable sludge, slurry and liquid waste streams.

WASTE TYPES

J120

Oily water / sludge

Z130

NDD waste

K130

Septic sludge

N205

Industrial liquid

WHO WE SUPPORT

Built for contractors, councils, utilities and industrial sites.

Industries

- ✓ Civil construction
- ✓ Utilities
- ✓ Telecommunications
- ✓ Commercial construction
- ✓ Local government
- ✓ Infrastructure
- ✓ Industrial facilities
- ✓ Manufacturing

Project Fit

Vacuum excavation, de-watering, OSD tank cleaning, confined space cleaning, liquid waste removal and high-pressure jetting can be planned for one-off call-outs, maintenance programs, emergency response and project-based works.

Ready to price or plan a job?

Send the site address, photos, access notes, expected material, volume and urgency. Our team will help confirm the right truck, hose run, disposal pathway and safety documentation.
